"GABRIEL" Bulletproof and NBC Protection Mobile Shelter

BULLET PROOF AND NBC PROTECTION MOBILE SHELTER

- Bullet, shrapnel and explosion proof.
- Maximum protection for 12 to 20 people within a gas-proof environment.
- Easily transportable.
- Suitable to all locations, without previous preparations.
- In times of emergency, it may be used as an NBC shelter against all types of known chemical and biological warfare agents.
- Appropriate in red-zone deployments, combat areas, chemical plants, field hospitals, electric power stations, and mobile command centers.
- A crane-mounted truck may transport the shelter.
- Filtering system purifies the air and allows a 24x7 operation.
- A monitoring valve system eliminates rarified air within the shelter through a decontamination chamber and washing room.
- A 400-liter water tank, operated by gravitation or an electric pump, supplies drinking water and other applications.
- The air-conditioning system is operated by 220VAC from mains or is self-powered by a generator.
- The shelter roof includes external thermal protection, with an option to convert the shelter into an inner thermal and soundproof shelter.
- The shelter is equipped with a chemical lavatory and sink, allowing for an extended stay.
- Optionally, it may be delivered with a food storage cabinet.
- Entrance to the shelter in hostile conditions is facilitated through the washing room followed by the decontamination chamber - both pressurized. Power supply inputs, communications, water and conditioned air with bulletproof protection and NBC filtration system.
