

SynerKey™

**Mechanical & Electronic
access in one key**

MUL-T-LOCK®

SynerKey™

Mechanical & Electronic access in one key

Keys, tags, cards – with today's complex High Security systems, users often need an entire collection of opening devices just to walk through one building! A whole collection – or just one SynerKey!

True to its long-standing **One Key Endless Possibilities** principle, Mul-T-Lock has developed the new SynerKey - offering you the convenience of a single all-in-one key for opening both mechanical locks and doors secured by RFID access control systems. All thanks to an ingeniously simple concept from our innovational R&D team:

SynerKey - a mechanical key with a key head that houses transponders for electronic access control systems.

Suitable for apartment and office buildings, commercial and industrial facilities, seniors' homes or any other premises used by a large number of residents or workers, friendly SynerKey is compatible with a range of popular Mul-T-Lock platforms: the mechanical 7x7®, Integrator®, Classic, Interactive®, and the new 5th generation MT5®, as well as the patented electronic RFID access control systems, Intellect®*, Intellect® Pro* and ProQsimity®*.

Mechanical, CLIQ & RFID access in one key

Mul-T-Lock's Interactive® CLIQ®*, the advanced electromechanical locking solution featuring a range of smart capabilities, is now friendlier than ever thanks to SynerCLIQ - the special all-in-one CLIQ key based on the concept of SynerKey.

With SynerCLIQ, a CLIQ key housing RFID transponders in its key head, users can now use a single key to open all doors in complex High Security systems, that combine mechanical locks and RFID access control with the Interactive® CLIQ®.

SynerCLIQ. Another **One Key Endless Possibilities** product from Mul-T-Lock.

* For more information on Mul-T-Lock's innovative products - the Interactive CLIQ, Intellect, Intellect Pro and ProQsimity, please visit our website at www.mul-t-lock.com.
