## Synthetic wearing courses on steel, wooden and concrete construction substrates

---

### PRODUCT SPECIFICATION

Technical specification of the product

General

Synthetic wearing course systems in accordance with evaluation guideline BRL-9143

“Synthetic wearing courses on steel, wooden, concrete and bituminous construction substrates”.

Application

Boligrip 1250

The product is suitable for application as a wearing course system for vehicle and/or pedestrian use on:

- Steel substrates for fast traffic;
- For traffic of classes 4 + 5.

Application

Boligrip W

The product is suitable for application as a wearing course system for vehicle and/or pedestrian use on:

- Concrete substrates for fast traffic;
  - For traffic of classes 4 + 5.
- 

Marking

The packaging of the synthetic wearing course material should be marked with:

- the KOMO<sup>®</sup> hallmark;
  - the certificate number;
  - the expiration date;
  - the required legal information.
- 

### SUGGESTIONS FOR THE USER

The products are intended for application as synthetic wearing course systems on steel, wooden, concrete and bituminous construction substrates. We recommend paying close attention to the following conditions for application:

On delivery, check:

- whether the products have been supplied as agreed;
- that the packaging has been marked correctly;
- the products for any visual damage due to transport or other reasons;
- the aggregate meets the criteria of the Building Materials Decree or other relevant legislation by means of a NL-BSB-certificate or a batch test.

If, based on the above, you refuse to accept the products, please contact:

- Bolidt Kunststoftoepassing B.V. in Hendrik Ido Ambacht, the Netherlands;

And, if necessary:

- Kiwa N.V.

For the correct storage, transport and processing methods, please refer to the processing instructions of the certificate holder.
