

MOBILE EXPLOSIVES AND AMMO MAGAZINES

- Mobile ferroconcrete magazines with shape of ISO-1C container
- Safe storage of explosives and ammunition (e.g. at military camps)
- Transportable to the place of operation – storage in foreign missions
- Minimizes necessary safety distances and risks of enemy attacks
- Allows common storage of high explosives and initiators in modules
- Resistant against detonation of up to 7 kg explosives in ammunition
- Capacity of up to 150 kg explosives in storage modules
- Reduces shock wave and fragments from accidental explosions
- Overpressure ventilated by a ventilating labyrinth
- Doors resistant against burglary, walls against small arms fire
- Optional heat insulation, Ex illumination, air-conditioning, alarm, automatic fire extinguishing systems, earthing, lighting rod
- Total weight 18 – 26 tons (without/with storage modules)
- Size L x W x H = 6.1 x 2.5 x 2.6 m
