# Products and Solutions

## Storage Solutions

- SAN, NAS, ISCSI, FC, Switching
- Virtualization and tiering
- Monolithic and Modular Systems

## Backup, Archiving and IT compliance

- Disk-to-disk backup
- Disk-to-tape backup
- De-duplication
- Virtual storage management systems

## Computing Platforms

- X86 and RISC Servers
- Virtualization

## Virtualization

- Efficiency
- Utilization
- Cost-effectiveness and flexibility
- Mobility of the computer hardware

## Enterprise Content Management

- Consolidate mounting information and ensure easy access, security and reliability of such critical asset

## Disaster Recovery and Business Continuity

- Help restore application data and services quickly and accurately
- Ensure availability of data in highly secure, tiered storage platforms

## Industry Solutions

- Provide industry-standard solutions that are flexible, scalable and superior in performance

## Information Infrastructure

- An integrated and simplified management of applications and data

## Solid State Disk for High Performance

- Fast access time to data and low latency

## Storage Resources Management

- Enhance storage utilization and minimize data loss

## Surveillance

- High-level data security and protection, easy access and seamless integration

# Support Services

[STME provides a tailored support solutions. Bespoke contracts with negotiated SLAs.]

- **Single Point of Accountability**
  - Reduce vendor complexity

  - Choice of monitoring facilities
  - Contract Management
- **Certified Service / Support Staff**
  - Symantec
  - Hitachi
  - SUN
  - NetApp
  - Cisco

# Professional Services

- **Assessment Services:**

- **Key Assessment Portfolio**

- Backup Infrastructure
  - Performance
  - Policies
- Storage Infrastructure
  - Performance
  - Utilization
  - Capacity planning
  - Health Check

- Server Virtualization and consolidation
- Archiving

- **Training Services:**

- Symantec
- HDS
- NetApp
- Cisco
- **Customized Onsite Training**

- **Consulting & Implementation Services:**

- Storage
- Backup
- Email Archiving
- Database Archiving
- Virtualization
- Replication
- Global Clustering
- Data Migration
- Design and POC's

- **Managed Services:**

- Resident Engineers
  - Storage
  - Backup
  - Archiving
  - High Availability
- **Remote Monitoring providing monitoring, alerting and metrics reporting**

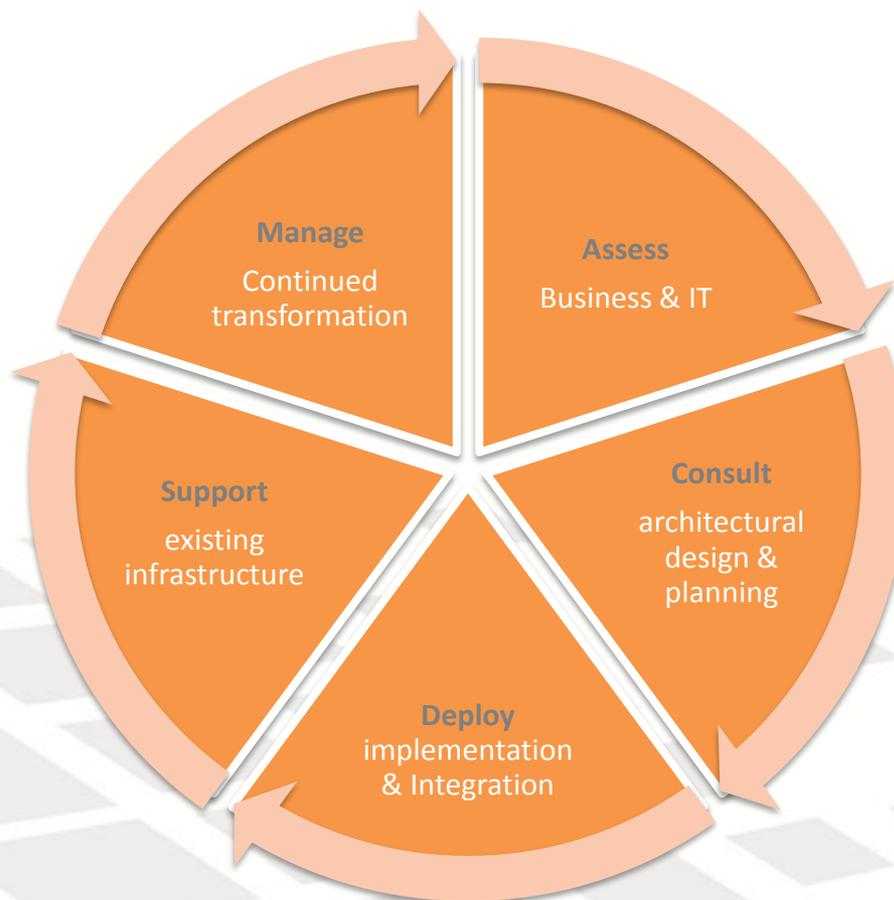

## → STME Today

- **Focus:** Information is vital for business
  - STME's role is to help businesses of all sizes to manage, store and protect data efficiently and cost-effectively

# Outstanding Customer Experience

## → Al Marai

- "STME showcased its in-depth expertise and know-how in delivering world-class IT solutions when they helped Almarai implement a groundbreaking technology in the Middle East, enabling us to achieve a phenomenal performance gain of up to 18 times in our daily operations. This is a truly remarkable achievement both from a technological and from a business perspective. With STME's ability to provide high-performance, business-critical IT applications, Almarai is confident that we will maintain a significant edge in the market despite the growing challenges," **Tanseer Kunjan, Business Systems Manager, Almarai.**

# Outstanding Customer Experience

## → Saudi Airlines

- "The unprecedented increase in online transactions and the high degree of sensitivity and security involved in our IT systems have made it an absolute necessity to have a highly reliable IT enterprise solutions provider. We are pleased that STME has consistently played such an important role for us throughout all the evolving challenges. Most recently, STME helped us implement the required IT infrastructure that has anchored our smooth transition towards a consolidated enterprise environment. As such, we remain confident with our long-term growth prospects because STME has effectively helped us in establishing agile IT assets and infrastructure," **Mohammad Ali Albakri, Chief System Engineering & Applications - Saudia ERP / MRO Initiative Director, Saudi Airlines.**

# STME METHODOLOGY

- We understand your business and strategy before we draw the architecture
- The architecture we design addresses your business requirements and is not meant to promote a specific brand or product
- We have access to the major players in the field of information infrastructure
- We provide 24x7 support with 2 hours response time all over the region
- We are the only company in the region that audits its implementations in the customers' datacenters to suggest improvements and eliminate risks
